

Create better sound with Bose® performance and support.

Houses of worship. Whether it's providing distributed sound coverage or meeting tight schedules, we understand the many design challenges you face. At Bose, our innovative products, exclusive tools and nationwide field support have helped designers and integrators meet the demands, and deadlines, for thousands of houses of worship – from small churches to large cathedrals. We can do the same for you and your clients.

SHEPHERD OF THE VALLEY LUTHERAN CHURCH

"The key issue was getting a clear, crisp sound throughout the room in a timely fashion. We felt very comfortable with Bose and we knew we had them behind us every step of the way."

– Shelley Hawkins,
District Sales Manager, Comp View

"When they sing an anthem and it touches people, you know it. You can look at the faces in the audience and tell how appreciative they are of what they hear."

– Pastor Paul Harrington,
Shepherd of the Valley
Lutheran Church, Apple Valley, MN

APPLE VALLEY, MINNESOTA

"A single cluster with three Panaray LT 6400 loudspeakers and two Panaray MB24 loudspeakers in an end fire bass array delivered the even coverage the church needed while preserving the sight lines for the audience."

– Jack Hudnut,
Bose Account Representative
