

Prestonwood Baptist Church, Plano, Texas

Is your congregation seeing the light?

Barco has a brilliant solution... the SLM Executive Series.

Captivate and enlighten your audience with Barco's SLM Series. This versatile projector series ranges in light output from 5,000 to 10,000 ANSI lumens and offers high-resolution images, seamless source switching and picture-in-picture. The picture-in-picture functionality is perfect for projecting song lyrics together with the choir or the minister, on the same screen.

Thanks to the combination of three-chip Digital Light Processing (DLP™) technology and Barco's powerful pixel map processing, your audience will enjoy sharp, vibrant video images, with remarkable color depth and uniformity. With the SLM Series, the congregation will truly understand the meaning of "a religious experience"!

Circle Reader Service No. 50

DLP™ technology by Texas Instruments offers crystal clear images with superior quality. DLP is a trademark of Texas Instruments.
